

Enrique “Hank” Alonso Joins HNTB as Construction Management Program Manager

Alonso’s extensive experience includes serving as Caltrans District 12 Deputy Director

Los Angeles ([PRWEB](#)) December 09, 2016 -- Enrique “Hank” Alonso, PE, joined HNTB Corporation’s Southern California team as construction management program manager and vice president. At HNTB, he will be the lead construction manager for the I-405 Improvement Project and support the firm’s work on major regional infrastructure projects. He will be based in the firm’s Orange County office.

Alonso brings over 33 years of technical expertise in construction management, including highways, oversight of design/build toll roads and direct management of the I-5 corridor reconstruction. His public sector experience encompasses managing environmental, planning, design and construction activities for over \$1 billion in infrastructure projects in California for clients, including Orange County Transportation Authority and Transportation Corridor Agencies, as well as serving as deputy district director for planning, design and construction in District 12 for Caltrans.

“As a well-respected industry professional, Hank’s exceptional leadership, insight and extensive experience in all aspects of technical engineering and management will be a valuable resource for our Southern California clients,” said Andres Ocon, PE, HNTB Southern California office leader and vice president. “His proven track record for business development and construction management services will further support our firm’s growth and development plans in the region.”

Prior to joining HNTB, Alonso served another transportation consulting firm as vice president for construction management in Southern California. His experience includes environmental planning work on the Riverside County Transportation Agency’s Mid County Parkway project; project management for OCTA’s SR 57 Widening Project; and project management director for the I-215 Widening Project for the San Bernardino Associated Governments, among others.

Alonso is a licensed professional engineer and earned a bachelor’s degree in civil engineering from the University of Arizona, Tucson. He is active professionally in the American Society of Civil Engineers, Construction Management Association of America and serves as an affiliate member of the University of California, Irvine.

HNTB is a leading infrastructure solutions firm in the U.S., with roots to the West since beginning work on Pasadena’s Arroyo Seco Bridge in 1914, the firm’s first year of operation, and has since been involved in some of the region’s most high-profile, complex infrastructure programs.

HNTB’s many signature infrastructure projects in Southern California include Interstate 405 Sepulveda Pass Improvements project, the Tom Bradley International Terminal Expansion for Los Angeles World Airports, and the “Green Build” expansion at San Diego International Airport.

Currently, HNTB is providing design and engineering services for the Crenshaw/LAX Transit Project on behalf of the Los Angeles County Metropolitan Transportation Authority and working with the City of Los Angeles to deliver final design and construction support services for the Sixth Street Viaduct over the Los Angeles River between downtown and Boyle Heights.

About HNTB

HNTB Corporation is an employee-owned infrastructure solutions firm serving public and private owners and contractors. HNTB's work in California dates back to its founding in 1914. Today, HNTB continues to grow in size and service offerings to clients in California from eight office locations, currently employing more than 350 full-time professionals. With more than a century of service, HNTB understands the life cycle of infrastructure and addresses clients' most complex technical, financial and operational challenges. Professionals nationwide deliver a full range of infrastructure-related services, including award-winning planning, design, program management and construction management.
