

Portable Cigar Ashtray for Vehicles - Designed by InventHelp Client (DHM-302)

Pittsburgh-based InventHelp is submitting the TWEEDS to appropriate companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) December 18, 2016 -- Although vehicles often come equipped with ashtrays, they are generally designed to be used for cigarettes. Cigar smokers tend to have difficulty storing lit cigars while driving due to the size of a cigar, which has the potential to ultimately interfere with vehicle safety.

An avid cigar smoker from Wilson, N.C., has invented the patent-pending TWEEDS, a portable cigar ashtray that can be easily implemented into a vehicle. "I have smoked cigars for years but have always found it difficult to smoke a cigar while driving my car," said the inventor. "I was inspired to invent this item after repurposing an old coffee cup as an ash tray."

TWEEDS allows drivers to easily store a lit cigar, allowing them to fully concentrate on traffic, improving driver safety. Additionally, TWEEDS helps to maintain the integrity of a vehicle's interior by reducing the chance of burns as a result of cigar ash.

This invention is also convenient for parties, gatherings and everyday use, in addition to in vehicles.

The original design was submitted to the Durham office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-DHM-302, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
