

Fremont (CA) Police Lower Costs by Using In-Car Video

San Carlos, CA.: The Fremont Police Department has lowered prosecution and court costs for the city by using In-Car Digital Wireless Video from Mobile Digital Systems, Inc. to record traffic incidents.

([PRWEB](#)) April 24, 2004 --The video systems, installed in some of the Police Department's vehicles record video and audio in traffic stops and pursuits, and is used to support officer reports. The Department has been testing the systems for over a year.

Lieutenant Gus Arroyo, Fremont PD, "of Mobile Digital's Digital Wireless Video systems in our cars has helped us to lower court and prosecution costs."

Angela Corrieri, President, Mobile Digital Systems, Inc., "we're happy to provide the Fremont Police Department with these advanced systems for the benefit of our community. The Fremont PD has helped us in testing and allowing us to improve our systems."

The Fremont Police Department has had a history of being a leader in utilizing technology to help its officers protect the Fremont community.
