

Durr Production Systems Goes from \$10Million to \$60Million with ETO ERP Encompix

Durr Production Systems Goes from \$10Million to \$60Million with ETO ERP Encompix

([PRWEB](#)) April 29, 2004 -- Chuck Stewart, Senior Vice President, of Cincinnati-based Encompix, has placed Michigan as the number one Engineer-to-Order (ETO) market focus. The following non-repetitive manufacturers in Michigan has elevated Encompix's ERP (Enterprise Resource Planning) rankings:

Automatic Handling, B&K Corporation, CMI, Delta Tooling, Gehring L.P., General Purpose Vehicles, Merrill Tool, Orbitform, Production Machining, Programmed Products, Simplicity Engineering, and Durr Production Systems.

Located in Farmington, Michigan, Durr Production Systems (DPS) designs and manufactures highly engineered-to-order machine tools for the automotive industry. After the software implementing in 1997, Durr has grown its business from \$10 million to over \$60 million without significantly increasing indirect labor.

According to Stewart, "Every Michigan ETO manufacturer is looking for a competitive edge. It may be reducing costs, improving productivity, improving customer service, and reducing lead-times. Investment in technology is a quantifiable way to achieve these objectives." Stewart noted that Michigan's ETO market is so important that he anticipates spending much of his time in the state.
