

InventHelp Inventor Solves the Problem of Cigarette-Smoke Buildup in Vehicles (ALL-584)

InventHelp, based in Pittsburgh, Pa., is submitting the SMOKE AIR VENTILATION SYSTEM to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) November 12, 2015 -- Driving in a vehicle that's full of cigarette smoke is uncomfortable and unhealthy, but having a window or windows down isn't always a desirable option. In order to solve this problem an inventor from Lawrenceville, Ga., conceived of the SMOKE AIR VENTILATION SYSTEM.

This system provides a more comfortable and healthier way to smoke in a vehicle. It prevents smoke buildup while eliminating the need to open a window or windows. It also avoids permanent smoke damage. The systems is easy to use, suitable for all vehicles and producible in design variations.

The original design was submitted to the Atlanta office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-ALL-584, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
