

## **InventHelp Inventor Develops Better Windshield Wiper (AVZ-1035)**

*InventHelp, a Pittsburgh-based invention submission company, is submitting the WINDSHIELD WIPER to companies for their consideration.*

PITTSBURGH, PA ([PRWEB](#)) November 12, 2015 -- "It is annoying having to make a pit stop at a gas station just to clean my windshield," said an inventor from Clear Lake, Iowa. "I thought that, if windshield wipers were more effective at removing dirt and debris, then motorists would not have to make as many stops.

He developed the WINDSHIELD WIPER to effectively remove stubborn dirt and debris stuck to the windshield. The design prevents smearing and streaking. The wiper ensures that the driver has a clear view of the road ahead. This reduces the need to stop as often in order to clean the windshield. The invention makes long drives more enjoyable. Also, it is adaptable for use on any vehicle.

The original design was submitted to the Telemarketing office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 13-AVZ-1035, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
