

Corrosion-Proof Vehicle-Battery Cable and Post - Designed by InventHelp Client (AVZ-1318)

InventHelp, a leading inventor service company, is submitting the LUBE CABLE & POST to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) November 13, 2015 -- The cable and post of my car battery became corroded, so an inventor from Blufton, S.C., had to resort to expensive repairs in order to solve the problem. "This inspired me to design a way to prevent this common hassle," he said.

The patent-pending LUBE CABLE & POST resist corrosion and prevent malfunction. They eliminate the need for cable disconnection, which avoids the hassle of computer and radio/clock reset. Easy to use and serving as an alternative to expensive repairs, they also can be used for lawn mowers and boats.

The original design was submitted to the Telemarketing office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-AVZ-1318, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
