InventHelp Inventor Develops Umbrella Holder for Automotive Use (FED-1532)

InventHelp, based in Pennsylvania, is submitting this idea, THE HOLDER, to companies for their potential feedback.

PITTSBURGH, PA (PRWEB) November 18, 2015 -- "I grew tired of stepping on wet umbrellas left on the floor of the passenger side of the vehicle," said an inventor from Kent, Wash. "I thought that there had to be a better way to store a wet umbrella, which led me to come up with this idea."

He developed the patent-pending THE HOLDER to offer a convenient place to store a collapsed wet umbrella in an automobile. The unit eliminates the need to store the umbrella on the floor. This prevents the umbrella from being stepped on by vehicle occupants. The unit also ensures that the vehicle interior remains dry and clean. The holder keeps the umbrella in a readily accessible location for ease of retrieval when needed. In addition, it is adaptable for use in any vehicle.

The original design was submitted to the Seattle office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-FED-1532, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
