

InventHelp Inventor Designs Child Safety System for Vehicles (FLA-2671)

Pittsburgh-based InventHelp is working to submit the GUARDIAN to companies for their consideration and potential feedback.

PITTSBURGH, PA ([PRWEB](#)) November 19, 2015 -- "As a police officer for the past 35 years, I have seen how easy it is for a busy parent to become distracted and forget a sleeping child/infant in the car seat," said an inventor, from West Palm Beach, Fla. "It is a tragedy that occurs far too often. I have seen it happen to the best of families and most conscientious of parents. I thought there needed to be an effective way to warn a driver to prevent this from happening, so I invented this."

The patent-pending GUARDIAN offers an effective way to notify drivers if a baby or young child is left in a vehicle. In doing so, it could help to prevent heat-related injuries or death. As a result, it enhances safety and it provides added peace of mind. The invention features a convenient design that is easy to use so it is ideal for parents with infants and young children. Additionally, the GUARDIAN is producible in design variations and a prototype is available.

The inventor described the invention design. "My design enhances safety for infants and children in car seats."

The original design was submitted to the Fort Lauderdale office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-FLA-2671, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
