

InventHelp Client Designs Ramp That Allows For Easier, Safer Gurney Use (LST-466)

Founded in 1984 in Pittsburgh, InventHelp is submitting the GURNEY GUIDE RAMP to companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) November 23, 2015 -- "As an EMT, I know how difficult and dangerous it can be to handle a gurney when parked on an inclined surface," said an inventor from Burbank, Calif., "so I decided to design a solution to this problem."

The GURNEY GUIDE RAMP provides an easier and safer way to handle a gurney when parked on an inclined surface. It stabilizes the gurney and prevents it from rolling away. It also facilitates loading of the patient into the ambulance, as well as avoids back injury and patient discomfort. The ramp is easy to use and producible in design variations.

The original design was submitted to the Los Angeles office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 13-LST-466, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
