

InventHelp Inventors Develop ATV Accessory for Hauling Cargo (POO-182)

A leading inventor service company, InventHelp is submitting the FOUR WHEELER RACK EXTENSION to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) August 23, 2016 -- "We use our four wheelers for pretty much everything, from hauling our dogs around to dragging game out of the woods," said one of two inventors from Culver, Ore. "We needed to be able to expand our hauling capacities when necessary, which led us to develop this idea."

They created a prototype for the patent-pending FOUR WHEELER RACK EXTENSION to expand the available carrying capacity of an ATV. The device is usable to haul people, coolers, gear, pets, game, etc. It eliminates the need to attach a trailer. The unit saves the owner from having to make as many trips to transport supplies. In addition, the invention is designed for ease of attachment.

The original design was submitted to the Portland office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-POO-182, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
