

Meter Receipt Keeper Invented by InventHelp Client (KPD-281)

A leading invention firm, InventHelp is submitting the KIOSK TICKET HOLDER to companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) August 23, 2016 -- There's never a good time to get a parking citation. However, it could happen if the police or meter readers cannot see the parking machine receipt in the parked car. Well, thanks to an inventor from Philadelphia, Pa., there is now an easy way to avoid a fine by making sure the time-stamped ticket is clearly visible.

He developed a prototype for KIOSK TICKET HOLDER to keep meter receipts or time tickets properly displayed. As long as the meter readers can see the receipt, there will be no consequences. It, thus, eliminates the frustration associated with losing a time-stamped parking machine receipts or having them blow away. Another advantage is that its simple design minimizes production costs. It is also convenient, user friendly and affordably priced. In addition, it is effective, lightweight and easy to install.

The inventor's personal experience inspired the idea. "There was a time when my parking machine receipt blew out of the window and was lost," he said. "I didn't want this to happen again."

The original design was submitted to the King of Prussia office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-KPD-281, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
