

InventHelp Accessory Helps Prevent Drivers From Falling Asleep (MLM-558)

Based in Pittsburgh, InventHelp is submitting the WIDE AWAKE Z COLLAR to companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) September 22, 2016 -- An inventor from Milwaukee, Wisc., knows the importance of alertness while driving, especially over long distances and for long periods. "As a full-time truck driver I need to stay awake for long periods, and I have to be as alert as possible in order to avoid accidents," he said. "This is why I invented a way to keep drivers awake and aware."

The WIDE AWAKE Z COLLAR keeps a driver awake and aware. It helps prevent him or her from falling asleep at the wheel, which avoids accidents, injuries, fatalities and damages. Overall, it promotes safety and peace of mind. Inexpensive and easy to use, the accessory is ideal for all drivers, especially truckers, road travelers and people with long commutes.

The original design was submitted to the Milwaukee office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-MLM-558, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
