

InventHelp Inventors Design Safer Trailer Backing System (NAV-910)

Based in Pennsylvania, InventHelp is submitting the TRUCK BACKING SYSTEM to companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) September 24, 2016 -- One of two inventors from Crawley, W.V., has been in the trucking industry for over 20 years, and he wants to improve its safety. "The co-inventor and I came up with something that meets this need," he said.

The patent-pending TRUCK BACKING SYSTEM enables a truck driver to back up any kind of trailer more safely. It helps avoid accidents and damage, which promotes peace of mind. Easy to use and reliable, the system also can be used for buses and RVs.

The original design was submitted to the Nevada office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-NAV-910, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
