

InventHelp Inventor Develops Roadside Safety Kit (VET-380)

A leading invention firm, InventHelp is submitting the SAFE TEE to companies in the hopes of their good faith review.

PITTSBURGH, PA ([PRWEB](#)) September 25, 2016 -- "I dreamed of this idea and the materials it would be made of," said an inventor from North Las Vegas, NV. "It solves a problem that confronts every household - safety. I want to help save the lives of individuals who simply want to cross the street. Far too many people are killed each year. It is like having your own personal crossing guard."

She developed the SAFE TEE to enhance the visibility of the individual. The unit ensures that passing motorists can see the individual clearly so as to avoid hitting them. This is designed to enhance personal safety. The invention provides added peace of mind. Additionally, the kit features an attention-getting design that stores easily in the trunk of an automobile.

The original design was submitted to the Las Vegas office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-VET-380, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
