

InventHelp® Client Develops Convenient Pickup-Truck Accessory BMA-4597

InventHelp, America's leading inventor service company, attempts to submit an invention, Multi Purpose Receiver, to companies for review.

Pittsburgh, PA ([PRWEB](#)) September 23, 2016 -- "I wanted to be able to mount a 1,200-pound winch to my vehicle without having to permanently attach it," said an inventor from Windham, N.H. "I thought that a far simpler solution would be to use the trailer hitch on the front of the vehicle as a mounting point."

He developed the patent-pending Multi Purpose Receiver to provide a quick and easy way to mount equipment to the front end of a pickup truck with an attached push frame. The device is ideal for use in temporarily securing a winch or other devices. The unit saves time and effort, and eliminates hassles and frustrations. It is designed for ease of use. In addition, the invention is ideal for professionals and do-it-yourselfers.

The original design was submitted to the Boston office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-BMA-4597, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
