

## **Device Allows For Quick and Easy Removal of Ice and Snow from Vehicles - Designed by InventHelp Client (WDH-982)**

*Founded in 1984 in Pittsburgh, InventHelp is submitting the DYNA BLOWER to appropriate companies for their potential feedback.*

PITTSBURGH, PA ([PRWEB](#)) September 25, 2016 -- It tends to be difficult for able-bodied people to remove ice and snow that has formed on vehicles, let alone people who struggle with physical disabilities, so an inventor from Mitchellville, Md., designed a device that solves this problem.

The DYNA BLOWER is a device that provides a quicker, easier way to remove ice and/or snow from a vehicle exterior. It eliminates the need for laborious chipping, dislodging and sweeping, which saves time and effort. As a result, it promotes convenience. Easy to use and versatile, the device is suitable for the general population but ideal for people with physical disabilities.

The original design was submitted to the Washington, DC office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-WDH-982, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
