

Inventor and InventHelp Client Develops ATV Accessory to Break up Spider Webs (RGL-130)

Founded in Pittsburgh in 1984, InventHelp is submitting the WEB BUSTER to companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) October 01, 2016 -- "I do a lot of hunting and trail riding on my ATV," said an inventor from Brusly, La. "I hate riding through unseen spider webs, which cling to my body and face, causing potentially dangerous distractions. I came up with this idea to keep riders safe from spider webs."

He developed the patent-pending WEB BUSTER to prevent spider webs from clinging to the rider. The unit ensures that the rider's view is not obstructed by spider webs that wrap around the face. It also helps to avoid spider bites. The invention enables the rider to focus fully on the road ahead, which lessens the risk of accident. The accessory provides added peace of mind and safety. Additionally, the device is adaptable for use with any ATV.

The original design was submitted to the National Sales Office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-RGL-130, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
