

SAHAR MAT Invented by InventHelp Client (CIC-128)

One of America's largest invention submission firms, InventHelp is submitting the SAHAR MAT to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) October 03, 2016 -- An inventor, from Chicago, Ill., thought there needed to be an easier way to remove snow and ice from a parked car, so she invented the SAHAR MAT.

The patent-pending SAHAR MAT prevents snow and ice from accumulating on a parked vehicle. In doing so, it eliminates the need to scrape or brush ice and snow from the vehicle. As a result, it saves time and effort and it enhances safety. The invention features an effective design that is convenient and easy to use so it is ideal for vehicle owners. Additionally, the SAHAR MAT is producible in design variations and a prototype model is available upon request.

The inventor described the invention design. “My design eliminates the need to manually brush snow and scrape ice from the exterior of a car.”

The original design was submitted to the Chicago office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-CIC-128, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
