

InventHelp System Improves Safety For Child Vehicle Passengers (IPL-269)

InventHelp, a leading invention submission company, is submitting the Safety Seat to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) October 08, 2016 -- Intentional abuse is not the only factor in child fatalities. Due to hurried schedules and other common distractions, drivers can forget to take children out after they've parked.

"Very concerned over the fatalities of children who were left behind in vehicles, I decided to design a way to prevent such horrible tragedies from happening," said an inventor from Sweetser, Ind.

To meet this need, he designed the patent-pending Safety Seat, a system that prevents children from being left behind in unattended vehicles. This helps save lives, which promotes safety and peace of mind. Easy to use and compatible with all vehicles, the system is ideal for parents and guardians of children.

The original design was submitted to the Indianapolis office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-IPL-269, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
