

## **InventHelp® Client Invention Ensures Safe Visibility for Drivers in Bright Sunlight (BRK-1107)**

*Pittsburgh-based InventHelp attempts to submit an invention, Auto Cuff, to companies for review.*

Pittsburgh, PA ([PRWEB](#)) October 10, 2016 -- Sometimes bright sunlight impedes a driver's visibility and raises the risk of injurious and/or fatal injuries. An inventor from Montgomery, Ala., has thought of the Auto Cuff in order to offer drivers an effective way to maintain safe visibility in such a situation.

This invention ensures safe visibility for one who is driving into bright sunlight by shielding the eyes in an optimal manner. As a result, it helps prevent accidents that can result in injury and/or fatality, which promotes peace of mind. The invention is easy to use, eliminates the need for conventional track-style visors and can be produced in different sizes, colors and materials.

The original design was submitted to the Birmingham office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-BRK-1107, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
