

Wagon Lift Invented by InventHelp® Client (BRK-1129)

Pittsburgh-based InventHelp attempts to submit an invention, Wagon Lift, to companies for review.

Pittsburgh, PA ([PRWEB](#)) October 12, 2016 -- An inventor, from Hartselle, Ala., thought there needed to be an easier way to transport sports gear, hunting supplies, toolboxes, beach/picnic supplies, and luggage to and from a vehicle, truck or camper. Also, the inventor saw a need for the Wagon Lift to traverse over various terrains but still go through doors, so he invented the Wagon Lift.

The Wagon Lift provides a more effective way to transport additional cargo to and from a vehicle. In doing so, it eliminates the need to lift and carry heavy items. As a result, it saves time and energy and it enhances storage space. The invention features a user-friendly design that is convenient and easy to use so it is ideal for vehicle owners. Additionally, the Wagon Lift is producible in design variations and offers a wide variety of options for different life activities.

The inventor described the invention design. “My design enhances convenience when transporting a variety of cargo.”

The original design was submitted to the Birmingham office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-BRK-1129, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
