

InventHelp® Client Invention Fights Vehicle Fires Efficiently (CCP-1157)

Pittsburgh-based InventHelp attempts to submit an invention, Cathy Life Saver, to companies for review.

Pittsburgh, PA ([PRWEB](#)) October 14, 2016 -- An inventor from Northlake, Ill., is concerned about the risk of vehicle fires and their horrible consequences. "I heard that there are over 30 vehicle fires daily and at least one person dies daily," she said. "My design helps to reduce the number of burn victims and deaths."

Easy to use and producible in different sizes, the Cathy Life Saver is a system that provides a quick, efficient way to put out vehicle fires. This helps avoid extensive damage, injuries and fatalities. It also eliminates the need to search for a conventional fire extinguisher. Overall, it promotes safety and peace of mind. The system can be added to existing vehicle and built into new vehicles.

The original design was submitted to the Chicago office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-CCP-1157, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
