

## **InventHelp's Vehicle Accessory Accommodates Laptop & Tablet Computers (LAX-744)**

*Based in Pittsburgh, Pa., InventHelp is submitting the WHEEL BUDDY to appropriate companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) October 11, 2016 -- An inventor from Acton, Calif., wanted a practical way to use his laptop or tablet computer within his motor vehicle. As such, he designed the WHEEL BUDDY – an accessory that would support a laptop or tablet from a vehicle’s steering wheel.

The patent-pending WHEEL BUDDY would position a laptop or tablet computer in an ergonomic position for a person seated in the driver’s seat of a parked car or truck. It would transform a vehicle into a mobile office and would allow an individual to work comfortably and efficiently in the field. It would also feature a stylish and sturdy design and could be easily transferred to and from different vehicles.

The inventor was inspired by his experiences as a real estate investor, construction inspector and contractor. “I often work in the field,” said the inventor “and needed a comfortable, practical way to use my laptop while working from my car.”

The original design was submitted to the Los Angeles office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-LAX-744 , InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
