

Vehicle Safety Accessory Invented by InventHelp Client (LGI-2195)

A Pittsburgh-based invention company, InventHelp is submitting the BB SAFETY LIGHTS to companies for their consideration.

Pittsburgh, PA ([PRWEB](#)) October 11, 2016 -- An inventor from Port Washington, N.Y. wanted a way to more easily alert oncoming traffic when a car door is opening. To that end, she invented the patent-pending BB SAFETY LIGHTS, a device that would enable the user to open a car door safely, especially at night.

The BB SAFETY LIGHTS is a device that would be easy to use by any motorist. It would utilize a unique design that would be inexpensive to install. It could also operate in conjunction with any vehicle's electrical system.

The inventor was inspired by personal observation. "I know that the unexpected opening of a car door can be dangerous and cause accidents," said the inventor. "I decided to create a device that would reduce the chance of these types of accidents from occurring."

The original design was submitted to the Long Island office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-LGI-2195, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
