

## **Car Accessory Invented by InventHelp Client (MTN-2612)**

*Based in Pennsylvania, InventHelp is submitting this idea, the EZ COVER to companies for their review and possible feedback.*

PITTSBURGH, PA ([PRWEB](#)) October 13, 2016 -- An inventor from Mt. Vernon, N.Y. wanted a way to more easily protect his vehicle from snow, dirt, bird droppings, etc. To that end, he invented the EZ COVER, a device that would enable the user to quickly and efficiently cover a motor vehicle.

The patent-pending EZ COVER would be a durable device that could be used by any motorist. It would utilize a unique design to quickly and easily allow the motorist to cover the vehicle. It would also be lightweight, compact, and easily removed.

The inventor was inspired by trying to apply standard car covers. "I was tired of the time and hassle it took to cover my car," said the inventor. "I decided to create a device that would allow the user to easily cover a car."

The original design was submitted to the Manhattan office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-MTN-2612, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
