

Inventor and InventHelp Client Develops Device for Retrieving Cargo from Truck Bed (TOR-9554)

One of America's leading invention companies, InventHelp is submitting the BED HOOK to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) October 18, 2016 -- "I hated having to climb onto the tailgate and into the bed each time I wanted to get something out of the back of my truck," said an inventor from Aylmer, Ontario, Canada. "I devised this device to make it easier to retrieve items from the bed. Now I can remain standing comfortably by the tailgate."

He created a prototype for the patent-pending BED HOOK to provide a quick, easy way to pull items toward the tailgate and out of the truck bed. The unit eliminates the need to climb onto the tailgate and into the bed. This reduces physical stress and strain, and saves time and effort. It also easily reaches beneath a truck cap to access stored items. Furthermore, the accessory is ideal for use by individuals with limited mobility.

The original design was submitted to the Toronto office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-TOR-9554, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
