

InventHelp® Client Develops Soothing Entertainment System for Infants (AUP-678)

InventHelp, America's leading inventor service company, attempts to submit an invention, 6 DOF Baby Soothing Seat, to companies for review.

Pittsburgh, PA ([PRWEB](#)) October 26, 2016 -- "My son would not stop crying unless he was driven around in my truck," said an inventor from Boerne, Texas. "I believe this invention will help any parent with soothing a crying baby."

He developed the patent-pending 6 DOF Baby Soothing Seat to simulate the sounds and motions of a vehicle in motion. This soothes a fussy, crying child, which helps him or her fall asleep more quickly and easily. The unit enables the child to relax and calm down. It saves the parent from having to put the child in the car and drive around. Furthermore, the invention lessens stress for parents and caregivers.

The original design was submitted to the Austin office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-AUP-678, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
