

## **Improved Combination Car Cleaner and Polish - Designed by InventHelp Client (JMC-1848)**

*Founded in 1984, InventHelp is submitting the DETAILER CLEANER JB MAGIC to companies in the hopes of their good faith review.*

PITTSBURGH, PA ([PRWEB](#)) October 27, 2016 -- Keeping a car looking like new can be quite a challenge considering the exposure it gets to the elements. Fortunately, an inventor from Chadron, Neb., has found an easy way to restore a car to its showroom appearance with a minimum of effort despite the weather.

He developed a prototype for the patent-pending DETAILER CLEANER JB MAGIC to clean exterior automobile parts instantly. Not only does it produce a high-gloss finish on chrome but it removes water spots on windows and bumpers as well. Furthermore, it dissolves yellow film on headlights and taillights. It, therefore, saves time and effort and can eliminate the cost of expensive auto detailing services. As such, it is easy to apply, waterproof and long lasting. It is also convenient, effective and affordably priced. In addition, it is ideal for both consumer and commercial use.

The inventor's work experience as an auto detailer inspired the idea. "I got tired of having to scrub, sand and use steel wool in detailing cars and wanted to find an easier and less time consuming method that would produce amazing results, he said."

The original design was submitted to the National Sales office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers.
