

InventHelp® Client Develops Novelty Taillight for Pickup-Truck Hitches (BTM-2306)

A Maryland-based InventHelp client has invented the Ram Tail, which is being submitted to companies for review.

Pittsburgh, PA ([PRWEB](#)) November 01, 2016 -- There are many ways to draw attention to one's truck, including expert paint jobs, flashy graphics, unique tires, etc. However, as an inventor from Temple Hills, Md., found, the one thing that doesn't seem to be paid attention to is the style of taillight.

"As a truck enthusiast, I wanted to develop a creative way to change the look of trucks' taillights," said the inventor. He then created a prototype of a new type of taillight.

The Ram Tail serves as an alternative to conventional pickup-truck taillights. It not only enhances the look of the truck but it shows the owner's support for a favorite truck company. Stylish and practical, the taillight also can be produced in many design variations.

The original design was submitted to the Baltimore office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-BTM-2306, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
