

## **Inventors and InventHelp Clients Develop Device for Accessing a Truck Bed Comfortably (JMC-1868)**

*A Pittsburgh-based invention firm, InventHelp is submitting the BULLDOG SAFETY STEP to companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) October 29, 2016 -- "Climbing into and out of the bed of my pickup truck is no easy task for me, and many other individuals have difficulty with this as well," said one of two inventors from Lowell, Ore. "While working in my shop, I devised a means of accessing the bed quickly and easily, without stress or strain."

They created a prototype for the patent-pending BULLDOG SAFETY STEP to enable an individual to climb into and out of a truck bed easily. The device reduces the physical stress and strain normally involved. It helps the individual to stay balanced in order to avoid slips and falls. All of this minimizes the risk of injury and enhances personal safety. The unit makes it easier to load and unload the bed. In addition, the accessory is adaptable for use with any pickup truck.

The original design was submitted to the National Sales Office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-JMC-1868, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
