

InventHelp Inventor Develops Attention-Getting Display for Stranded Motorists (KVV-157)

One of America's largest invention firms, InventHelp is submitting the WESRAY SALES SAFETY LIGHT to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) October 29, 2016 -- One of America's largest invention firms, InventHelp is submitting the WESRAY SALES SAFETY LIGHT to companies for their review.

"I travel frequently, and I have seen many motorists stuck on the roadside with disabled vehicles," said an inventor from Knoxville, Tenn. "I wanted to ensure the safety of these stranded motorists while they waited for help to arrive, so I designed this attention-getting display."

He developed the patent-pending WESRAY SALES SAFETY LIGHT to ensure that approaching drivers are aware of the stopped vehicle. It enables drivers to slow down and steer clear of the vehicle. This helps reduce the incidence of collisions and insurance costs. The invention is designed to enhance personal safety and provides added peace of mind. Additionally, the unit allows roadside repairs to be performed without lesser risk of being struck by a passing vehicle.

WES RAY SALES SAFETY LIGHT also is usable for school buses, tractor trailers, delivery trucks and vans, motor homes, etc. Departments of Transportation and unions can ensure widespread use.

The original design was submitted to the Knoxville office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-KVV-157, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
