

## **Alternative Emergency Light Benefits Law-Enforcement and Emergency Vehicles - Designed by InventHelp Client (LCC-3148)**

*Based in Pittsburgh, Pa., InventHelp is submitting the Covert Light Bar System to companies for their consideration.*

Pittsburgh, PA ([PRWEB](#)) October 29, 2016 -- An inventor from Halifax, Pa., currently works in law enforcement, so he's concerned about unmarked police vehicles not being as discreet as they should be until emergency lights are absolutely necessary. In order to solve this problem he conceived of the Covert Light Bar System. Its benefit can go beyond law enforcement, providing alternative emergency lights for a wide variety of purposes.

This alternative roof light makes an unmarked law-enforcement vehicle more discreet. It allows for anonymity until lights are needed, but it's very visible when in use in order to ensure legality.

Because the light is inconspicuous when deactivated, it helps police blend in with traffic and catch law violators. Also, the light is beneficial for ambulances, beach patrol, river rescue, fire trucks, construction vehicles, etc.

The original design was submitted to the Lancaster office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-LCC-3148, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
