

Inventor and InventHelp Client Designs BRAKE IT (QCY-118)

Inventhelp, a leading invention submission company, is submitting the BRAKE IT to companies for their potential interest.

PITTSBURGH, PA ([PRWEB](#)) November 05, 2016 -- An inventor, from Winston-Salem, N.C., thought there needed to be a way to maximize safety and stability on the garage floor when using a jack, so he invented the BRAKE IT.

The BRAKE IT provides an improved way to utilize a floor jack. In doing so, it helps to prevent a floor jack from spinning or moving. As a result, it enhances safety and it provides added peace of mind. The invention features a user-friendly design that is convenient and easy to use so it is ideal for mechanics and do-it-yourselfers. Additionally, the BRAKE IT is producible in design variations.

The inventor described the invention design. “My design helps to prevent a floor jack from rolling or shifting during use.”

The original design was submitted to the National Sales Office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-QCY-118, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
