

## **Alternative Car Charger Allows For Convenient Charging of Multiple Cell Phones - Designed by InventHelp Client (ROH-237)**

*A leading invention submission company, InventHelp is submitting the WIRELESS AUTOMOBILE CHARGER to companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) November 05, 2016 -- An inventor from Rochester, N.Y., was in a car with family and friends, and a few of them had dead cell phones but no wires that matched the car charger. This prompted him to think of a better way to charge phones in vehicles.

The WIRELESS AUTOMOBILE CHARGER enables people to charge their cell phones in a vehicle in an easy and convenient manner. It eliminates the need for matching wires and chargers. Overall, it avoids the hassle of having dead phones while out and about, as well as promotes peace of mind.

Affordable, versatile and featuring an easy-to-use design, the device can be made in different sizes, colors and designs.

The original design was submitted to the Rochester office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-ROH-237, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
