

## **TIRE MACHINE Provides an Alternative Way to Change Tires - Designed by InventHelp Client (TOR-9598)**

*InventHelp, a Pittsburgh-based invention submission company, is submitting the TIRE MACHINE to companies for their consideration.*

PITTSBURGH, PA ([PRWEB](#)) November 08, 2016 -- An inventor from Drayton, Ontario, Canada, wanted to have his winter tires changed at a garage, but he was told that there was a three-week wait. Every other garage he went to had waits for about two to three weeks. "This inspired me to go home and develop an alternative way to complete this task," he said.

He then created a prototype of the patent-pending TIRE MACHINE, a device that provides a quicker, easier way to remove and replace a tire on a rim. It eliminates the need to go to a professional garage, which avoids long wait periods and saves money. Overall, it avoids strain and hassle.

The device is versatile, durable, non-corrosive, inexpensive, portable and easy to use.

The original design was submitted to the Toronto office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-TOR-9598, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
