

Attractive Car Accessory Invented by InventHelp Client (CPC-119)

Pittsburgh-based InventHelp is submitting WINDOWS WITH INTEGRAL SOLAR-POWERED ILLUMINATION to companies for consideration.

PITTSBURGH, PA ([PRWEB](#)) November 10, 2016 -- An inventor from Oakville, Conn. wanted a way to enable a driver to give his vehicle windows a unique look. To that end, he invented the patent-pending WINDOWS WITH INTEGRAL SOLAR-POWERED ILLUMINATION, a device that would allow vehicle windows to glow with color.

The WINDOWS WITH INTEGRAL SOLAR-POWERED ILLUMINATION would be a device that would be easy to use by any motorist. It would utilize a unique design that would be inexpensive to install. It could also operate in conjunction with a solar battery system.

The inventor was inspired by personal observation. "I knew that people often like to use glowing accessories on their cars," said the inventor. "I decided to create a way to make the windows glow."

The original design was submitted to the Connecticut office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-CPC-119, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
