

## **RV Cleaning Accessory Invented by InventHelp Client (HTM-3392)**

*Founded in Pittsburgh in 1984, InventHelp is submitting the RV BOOT SCRUBBER to companies for their consideration.*

PITTSBURGH, PA ([PRWEB](#)) November 12, 2016 -- An inventor from Winfield, Mo., wanted a way to keep mud off the steps and inside of their camper. As such, they invented RV BOOT SCRUBBER for use by owners of recreational vehicles.

RV BOOT SCRUBBER keeps mud off the steps and out of the camper, thereby avoiding a mess that is time-consuming and difficult to clean. This upholds the appearance and condition of the camper interior while reducing the frequency of cleaning.

The inventor was inspired by their own experience with their camper. "I needed a way to keep mud off of the steps and inside of my camper." The invention is affordable, practical, lightweight and waterproof.

The original design was submitted to the Telemarketing office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-HTM-3392, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
