

Inventor and InventHelp Client Develops Hassle-Free Trailer (POO-195)

Founded in Pittsburgh in 1984, InventHelp is submitting the UNIE TRAILER to appropriate companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) November 19, 2016 -- "Many people do not possess the skill required to back up a trailer," said an inventor from King City, Ore. "To make the difficult task easier so that anyone can attach a trailer with ease and drive with confidence, I devised this improved trailer."

He developed the patent-pending UNIE TRAILER to attach directly to the vehicle. The trailer does not require a pivoting ball or pintle hitch. It can be backed up in every direction. The trailer is designed so that it does not require expert skill for attachment and maneuvering. The invention makes it easier to take along equipment and supplies on camping, fishing or hunting trips, etc. Additionally, it offers extra hauling space for smaller vehicles, and it can be used for hauling gardening and lumber supplies.

The original design was submitted to the Portland office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-POO-195, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
