

## **InventHelp Invention Protects Wheel Rims During Tire Cleaning/Polishing (ALL-781)**

*InventHelp is working to submit this idea, the WHEEL PROTECTOR SHIELD, to applicable companies for their consideration.*

PITTSBURGH, PA ([PRWEB](#)) November 22, 2016 -- Many vehicle owners like to keep their cars and trucks looking as close to perfect as possible, and that involves maintaining shiny rims and tires. This has inspired an inventor from Elberton, Ga., to design the WHEEL PROTECTOR SHIELD. "It's hard to protect wheel rims from being marred or eventually damaged by contact with tire-cleaning/polishing chemicals," he said. "In order to solve this problem, I conceived of this design."

This device enables a user to clean and polish a tire without marring the rim. This avoids eyesores and eventual damage, and keeps the rim looking neat and aesthetic. It also eliminates the need to clean the rim over again, which saves time and effort.

Featuring an easy-to-use design, the WHEEL PROTECTOR SHIELD can be produced in different colors, and it is designed to appeal to all vehicle owners.

The original design was submitted to the Atlanta office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-ALL-781, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
