

New Vehicle Safety System Invented by InventHelp Client (BGF-1084)

One of America's largest invention companies, InventHelp is submitting the P.D.S.S. to companies for their possible feedback.

PITTSBURGH, PA ([PRWEB](#)) November 23, 2016 -- An inventor from Redford, Mich., wanted a way to prohibit texting and talking on a hand-held cellular phone while driving a motor vehicle. As such, they invented P.D.S.S. for use by anyone operating a motor vehicle. P.D.S.S. is an electronic safety system that helps drivers safely manipulate their vehicles in traffic without the distraction of accepting and making calls or text messages from a mobile phone.

The inventor was inspired by their desire to prohibit the distraction of drivers and to save the lives of other motorists and bystanders. "I felt this was necessary within our evolving society of technology and advances in computer science." The invention provides peace of mind for concerned parents and business owners by creating a safer driving environment.

The original design was submitted to the Bingham Farms office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-BGF-1084, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
