

## **SELF APPLYING HELMET Invented by InventHelp Client (CCT-3022)**

*InventHelp is submitting this idea, the SELF APPLYING HELMET, to appropriate companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) November 24, 2016 -- An inventor, from Waynesville, Ohio, thought there needed to be a way to protect a driver's and passenger's heads in the event of a side collision, so he invented the patent-pending SELF APPLYING HELMET.

The SELF APPLYING HELMET enhances safety and protection. It provides an effective way to protect the driver's and passenger's heads during a side collision by absorbing forces. The invention features a secure design that is easy to install and use so it is ideal for vehicle owners. Additionally, the SELF APPLYING HELMET is producible in design variations and a prototype is available.

The inventor described the invention design. "This invention was inspired after I had to take care of a friend who got a head injury from a car accident. My design helps to reduce potential injuries by lessening the impact on a driver's and passenger's heads."

The original design was submitted to the Cincinnati office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-CCT-3022, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
