

InventHelp Inventor Develops Cost-Effective Rack for Pickup Trucks (FED-1640)

Pittsburgh-based InventHelp is submitting this idea, the SIMPLE RACK, to companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) November 25, 2016 -- "Most truck racks on the market are made of metal and end up being expensive to purchase and install," said an inventor from Seattle, Wash. "I thought that there had to be a more cost-effective way to design truck racks, which led me to develop my idea."

He developed the patent-pending SIMPLE RACK to offer an efficient way to haul longer items within the truck bed. It is ideal for securing and transporting long boards, pipes, tubing and other building supplies. The unit is designed as an affordable alternative to expensive metal truck racks. It features a low-profile appearance that does not detract from the appearance of the truck. Furthermore, the rack is easy to install on any new or existing pickup truck.

The original design was submitted to the Seattle office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-FED-1640, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
