

Snow Removal Kit Invented for Motorists - Designed by InventHelp Client (KPD-345)

InventHelp is working to submit this idea, the SNOW GO, to appropriate companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) November 27, 2016 -- Since winter weather is not always predictable, it's not easy for motorists who park outside to be prepared to dig their cars out of a snowfall. Thanks to the creativity of an inventor from Philadelphia, Pa., however, drivers can now be ready for any future snow storms.

She developed SNOW GO to provide drivers with proper tools to clear snow and ice from cars and surrounding areas. As such, it prevents motorists from getting stranded because of winter weather. Thus, it saves time, effort and the expense of road assistance services. At the same time, it keeps the user's hands warm. Also important, it helps get drivers to work on time. In other words, it avoids late arrivals or missed appointments. Also, it is safe, user friendly, durable and readily accessible. In addition, it is convenient, effective and affordably priced.

The inventor's personal situation inspired the idea. "I'm a single woman, and I don't have anyone to clear off my car for me without paying them when the weather brings snow and ice," she said.

The original design was submitted to the King of Prussia office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-KPD-345, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
