

InventHelp Inventor Develops Improved Ice-Removal Tool for Motorists (LCC-3191)

InventHelp is working to submit the ICE MENZ to applicable companies for their review.

PITTSBURGH, PA ([PRWEB](#)) November 28, 2016 -- "I was scraping the ice off my truck one winter morning, and I had to get the job done was a water bottle," said an inventor from Littlestown, Pa. "I was using the rim of the bottle to scrape off ice, and then the idea hit me to invent a better ice-removal tool."

He developed the ICE MENZ to provide a quicker, easier way to remove ice from a vehicle. The design saves time and effort, and eliminates hassles and frustrations. The accessory ensures that the driver can see out of all the windows clearly. The tool is also usable to clean dirt, dust, bugs and other debris from the windows. Furthermore, the invention features a compact, easily portable design for use with any vehicle.

The original design was submitted to the Lancaster office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-LCC-3191, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
