

InventHelp Inventor Develops Snow-Removal Tool for Vehicles (LGI-2265)

InventHelp, founded in 1984 in Pittsburgh, is submitting the SNOW CAR CLEAN to companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) November 28, 2016 -- "When I clean snow off the top of my vehicle I can hardly reach the top, and I get snow all over my belly from leaning on the car," said an inventor from Jamaica, N.Y. "I thought that there had to be a way to clear ice and snow off the roof, which led me to develop this tool."

She developed the SNOW CAR CLEAN to provide a quick, easy way to remove ice and snow from a parked vehicle. The design makes it easier to clear ice and snow off the roof. It prevents the user from getting covered with snow during the process. The easily adjustable design eliminates the need to bend or strain, which avoids hassles and frustrations. Additionally, the invention ensures that the vehicle is ready for winter travel.

The original design was submitted to the Long Island office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-LGI-2265, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
