

Inventor and InventHelp Client Develops Environmentally Friendly Road Flare (NJD-1238)

InventHelp is working to submit the EMERGENCY IMITATION FLARE to appropriate companies for their review.

PITTSBURGH, PA ([PRWEB](#)) November 30, 2016 -- "I saw conventional flares set up on the roadway, and I saw that they were leaving a toxic residue behind," said an inventor from Elmwood Park, N.J. "I thought that there had to be a more eco-friendly way to design road flares that were just as bright and attention-getting."

He developed the patent-pending EMERGENCY IMITATION FLARE to draw attention to an obstacle and directs traffic around it. The unit reduces the risk of accidents and collisions in the area. It also lessens the need for police to direct traffic. The flare is quick and easy to set up and take down, and it is designed to be bright and highly visible. Additionally, the invention can be carried in the trunk of any vehicle for ease of use.

The original design was submitted to the New Jersey office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-NJD-1238, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
