

Portable Device Assists with Getting into and out of Taller Vehicles - Designed by InventHelp Client (NJD-1254)

Pittsburgh-based InventHelp is attempting to submit the SUV-EZ-STEP to companies for their potential consideration.

PITTSBURGH, PA ([PRWEB](#)) November 30, 2016 -- "I have trouble getting into and out of my vehicle because the running board is positioned high off the ground," said an inventor from Nutley, N.J. "I came up with this idea so that I could step onto and off of the running board more safely. Also, my wife who is handicapped uses it also, which makes it possible for her to ride in my SUV."

He created a prototype for the SUV-EZ-STEP to make it easier to get into and out of a tall vehicle, such as an SUV, pickup truck or van. The unit provides added stability and safety. The device reduces the risk of slips and falls, which lessens the possibility for injury. It is ideal for use by motorists with limited mobility. Furthermore, the invention features a compact, easily portable design.

The original design was submitted to the New Jersey office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-NJD-1254, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
