

CAR SHIELD Keeps Bugs and Debris Out of Open-Windowed Vehicles - Designed by InventHelp Client (PND-4499)

InventHelp is working to submit this idea, the CAR SHIELD, to applicable companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) December 02, 2016 -- Tired of bugs getting into my vehicle while she was driving with the windows down, an inventor from Mays Landing, N.J., decided that there should be a better way of being able to enjoy the open air in vehicles. "This is better than having to keep the windows up at all times," she said.

The CAR SHIELD provides a better way to keep the windows down while driving by preventing insects and airborne debris from getting into the vehicle. This avoids distractions that could cause accidents. Also, it promotes comfort and enjoyment while on the road.

Features an easy-to-use design that's compatible with all vehicles, the CAR SHIELD's variations include different sizes, colors and designs.

The original design was submitted to the Philadelphia office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-PND-4499, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
