

Inventor and InventHelp Client Designs Improved Portable Jack (SAH-1131)

Pittsburgh-based InventHelp is submitting the LONNIE JACK to applicable companies for their potential feedback.

PITTSBURGH, PA ([PRWEB](#)) December 02, 2016 -- An inventor, from Copperopolis, Calif., thought there needed to be a fast and easy way to use a car jack on any terrain, so he invented the patent-pending LONNIE JACK.

The LONNIE JACK provides a more effective way to use a jack on various ground surfaces. In doing so, it offers an improved alternative to traditional jacks. As a result, it saves time and effort when changing a tire and it offers added convenience. The invention features a user friendly design that is easy to apply and use so it is ideal for vehicle owners. Additionally, the LONNIE JACK is producible in design variations.

The inventor described the invention design. “My design simplifies the task of changing a tire, wheel or track, such as for construction equipment and farm tractors.”

The original design was submitted to the Sacramento office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-SAH-1131, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
